

Paediatricians with Expertise in Cardiology at RCPCH 2018, Glasgow

- 1430-1500** Guest lecture - Heart murmurs in Children – an approach to diagnosis
Dr Vikranth Venugopalan, Consultant Neonatologist with Expertise in Paediatric Cardiology, Birmingham City Hospital
- 1500-1530** Guest Lecture - The collapsed child – fluid or inotrope, and which inotrope?
Dr Yogen Singh, Consultant Neonatologist & Paediatrician with Cardiology Expertise, Cambridge University Hospitals
- 1530-1540** **G240** Using the Delphi method to develop consensus on a referral pathway for potentially abnormal neurodevelopment in children with heart disease, **Dr Arpana Hoskote ID604**
- 1540-1550** **G241** Incidence and Outcomes of Infants with Congenital Diaphragmatic Hernia Associated with Cardiovascular Malformation: A 10 Years Retrospective Study **Mr Tom Newman ID149**
- 1550-1600** **G242** Improved antenatal detection of critical congenital heart disease results in improved outcome **Dr Kenneth Khor ID65**
- 1600-1630** Refreshment break and poster viewing
- 1630-1640** **G243** A more efficient regional cardiac network: Yes, WeCCaNI! **Dr Paraskevi Mikrou ID159**
- 1640-1650 ID305** **G244** How good are paediatric doctors in interpreting ECGs **Dr Lekshmy Prasad ID305**
- 1655–1705** **G245** Risk factors for abnormal development and cognitive function in children with congenital heart disease and implications for service provision in the UK **Ms Victoria Banks ID610**
- 1705-1735** Guest Lecture - Critical neonatal heart disease – early diagnosis and resuscitation
Dr P Venugopalan, Consultant Paediatrician with Cardiology Expertise, Brighton & Sussex University Hospitals NHS Trust
- 1735–1800** Q&A Session – All Faculty
Prize distribution - The best oral presentation and best poster

POSTERS

- G246(P)** Closing the Ductus Arteriosus in preterm infants. A review of present treatment strategies and developing a disease staging protocol **Dr Hemmay Raychaudhuri ID 63**
- G247(P)** Antenatal detection and 30-day mortality in critical congenital heart disease with two ventricle outcome: a population-based study **Dr Kenneth Khor ID 66**
- G248(P)** Significant findings? Difficulties triaging referrals of children with heart murmurs **Dr J Round ID 106**
- G249(P)** Atrial arrhythmias following umbilical catheterisation **Dr Bivan Saha ID 138**
- G250(P)** Supraventricular tachycardia due to blunt chesttrauma **Dr J Haslam ID 314**
- G251(P)** Cardiac murmurs in neonates : Review of current local practice and clinical outcomes **Dr Haritha Rao ID 321**
- G252(P)** How relevant is an incidental finding of abnormal cardiac silhouette on Chest X-Ray? **Miss Francesca Scott ID 448**
- G253(P)** The risk of developing necrotising enterocolitis in infants with congenital heart disease undergoing invasive cardiac procedures, **Mr Leel Nellihela ID 473**
- G254(P)** Changing pattern of neonatal PDA ligation across a network **Dr Wilf Kelsall ID 585**
- G255(P)** Aortic and pulmonary artery calcification in twin-to-twin transfusion syndrome **Dr Rahul Udaya Prasad ID 734**
